Bonnie Burton : The Star Wars Craft Book (Star Wars - Legends) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Star Wars Craft Book (Star Wars - Legends):

He loves being tactile and is very imaginative. My sister was so excited saying it was PERFECT for him! This book allows for a creative, fun outlet that is sensory too. The crafts are cheap and fairly practical. And with the new movie coming out, it is a HUGE hit. I win "Favorite Aunt" of the year! :) 0 of 0 people found the following review helpful. We love this book! By CWe love this book! Bought it for my 8 yr old and we've done several of the crafts already. 0 of 0 people found the following review helpful. Just plain fun! By Ashley Lewis This book brings two things to you and that is fun and Star Wars. I tell you I love me some Star Wars and my wife loves crafts (she's a teacher). So what better way to bring us together than doing crafts, Star Wars style. I will say this book has many great ideas that can be done with a little patience and effort. It's great fun for the whole family. There are a lot of really easy crafts in this book for those of us, like myself, who aren't very creative, but there are also more challenging crafts for those who would love a challenge. There are so many fun things to do in this book for everyday and even some holiday themed crafts the family can get behind. All in all I will say that finally I can have her fun and love it too.
