What a great series. I was never a big fan of animals, but Beast Wars was designed to make you fall in love. Simply amazing, from storytelling, to great characters.Get into BW today!5 out of 5 stars. Simply amazing!0 of 0 people found the following review helpful.

Beast Wars Sourcebook By Eduardo Freyre I've been meaning to check out IDW's recent attempts at the vastness of the Transformers franchise. I picked this book up to see what they did to the Beast Wars part of the mythos. I was blown away by how inclusive this is. In addition to the characters we know and love from the CGI cartoon, we get bios on characters who never went beyond toy form and characters from the Japanese cartoons. It's interesting to see how IDW is melding all these various characters together into one giant shared universe. 0 of 0 people found the following review helpful. Like Re-generation One. Falls short. By Nyklas78 I thought this would be a nice companion piece to the Dreamwave's More than meets the eye guide books. It does feature characters you would not normally see. It does mention its G1 origins. But really falls short on the most popular characters in the series. Kinda really disappointing in that regard.

From Air Hammer to Wolfgang and beyond, and featuring all-new art from a host of the greatest Transformers artists like Don Figueroa, Guido Guidi, Dan Khanna, Nick Roche, Rob Ruffolo, and many more, this is the guidebook Transformers fans have been clamoring for!
