Kimberley Payne : Trees of the Book (Science and Faith Matters; V.1) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Trees of the Book (Science and Faith Matters; V.1):

5 of 5 people found the following review helpful. Great Book for Homeschooling and More! By Laura Davis Trees of the Book, Learning From God's Creation is the first book in the Science and Faith Matters series, by author Kimberley Payne. It is a delightful look at the trees of the Bible, their purpose, and what we can learn from them. With beautiful illustrations that will captivate children, Payne has created a unique balance between science and faith. Each of the seven chapters includes a bible story from the viewpoint of the tree. Accompanying the story are "science facts" helping children to pinpoint a certain tree by its characteristics. The illustrations, beautifully done by Esther Haug, include a close up picture of a leaf on the tree studied for that day. This is an excellent tool for homeschoolers as you could take your children out to the park with this book in hand and have them see what trees they can spot through the pages of this book. Along with science facts, there are questions for discussion, Bible verses, and activities such as

Word Searches, Puzzle games and even a colour by number activity. There are seven chapters for seven days of individual reading. This is why I say it is perfect for homeschoolers looking to mix science and faith together. An excellent book that is sure to delight your children. I give Trees of the Book 5/5 stars! 1 of 1 people found the following review helpful. excellent teaching tool for science and more! By Matthew D. Lorentzen What can I say about this biblically themed book? A lot, actually. First, whoever thought of teaching in this way, that is directing youngsters to the Bible to learn about science, is a genius. I'm guessing it was the writer herself. Whether you look to the good book for direction in your life, or not, you will surely appreciate this detailed study of trees that were either commented on, or had a more notable role in events or illustrations found in scripture. I especially enjoy the illustrations of the trees under discussion or of specific Bible accounts. These are presented with a sort of glowing effect that suggests use of colored pencil or something similar that your child will readily identify with. There is a separate reference section at the end, as well as an activity corner for kids. Kimberly Payne is an author as well as a motivational speaker and that shows here, as this isn't just factual material, but it really has a heart that can inspire the reader to take a closer look at their surroundings and think deeply beyond what they see on the surface. 5 of 5 people found the following review helpful. Great Children's Activity Book Describing Trees in the Bible By Larry B. Gray Trees of the Book by Kimberly Payne is a great children's activity book describing some of the trees mentioned in the Bible. It is well written and illustrated. I found the description of the trees very informative, easy to understand on an elementary level. It is fun the way she related each to a passage in the Bible describing how God actually used that type of tree. The activity section with each tree was both a learning tool and fun to do. This book will keep your child interested. I enjoyed Trees of the Book by Kimberly Payne and highly recommend it. It is a must add to your entire child's home reading and would make an awesome Bible study addition. [Please note: I was given a free copy of this book in exchange for my honest review.]

Trees of the Book is a 26 page children's activity book, #1 in the Science Faith Matters Series. It explores the trees discussed in the Bible in a way that is both fun and informative for children of the grade 2 - 3 level, or ages 7-9. With a colorful interior and 8.5" x 11" format for comfortable handling for children, it offers challenging activities, fun facts, opportunities for Bible study and presentation of stories connected to the trees.
